

I'm not robot!

Translate animation in android studio, Translation animation android.

This tutorial is dedicated to learning TranslateAnimation via simple step by step examples. Example 1: Kotlin Android TranslateAnimations This example shows the effect of selecting each of seven different types of [TranslateAnimation] interpolator: "Accelerate", "Decelerate", "Accelerate/Decelerate", "Anticipate", "Overshoot", "Anticipate/Overshoot", and "Bounce". Step 1: Create Project Start by creating an empty Android Studio project. Step 2: Dependencies No special or third party dependencies are needed. Step 3: Design Layout Create a layout known as animation_3.xml and add the following code: animation_3.xml Add two TextViews and a spinner:
